Lyft has free rides in every city, and we know three ways you can get yours. The cars with the pink mustache give lots of free rides if you know where to look. After discovering a bar that gave free \$25 coupons, I spoke to a Lyft representative to find out where some other lesser-known deals could be found. Here's what they said: Referral Program: Lyft has a referral program that offers \$25 to both the new and referring customer. All you have to do is sign in with your friend's referral code to get your first free ride. When you sign up, you have your own referral code to hand out to other first-time Lyft riders. When they make their first ride using your code, you're awarded another \$25. Pioneer Program: The Pioneer program is how Lyft introduces itself to a new city. In Boston, new riders get their first ten rides for free, while in New York new customers currently receive their first two rides for free (up to \$25). The only way to know how many rides are available in your city is to sign up for the service and see if you've automatically credited the rides. Locations: Watch out for Lyft maps like the one above at your local locations. Lyft is partnering with locations in nearly 65 cities across the U.S. to have these maps available when you're on the road. We weren't told if all these coupons are for first-time riders or repeat customers, so keep your eyes peeled to see if you get a special deal in your city. You should always ask your Lyft driver what deals are available in the city to see how you might otherwise cut down on your travel costs. If they like you, they'll probably hook you up. Branson can be a year-round destination that offers visitors the chance to see flowering dogwood, redbud and wildflowers in spring; participate in outdoor activities such as fishing and boating in the summer; see changing leaves in autumn; and experience holiday events in winter. The most popular time to visit is June through December, when families go on holiday and major events take place. The least popular time is in January through March, when some attractions may close and cold weather is expected. Spring is an ideal time to visit, as there are fewer visitors, lower prices and more favorable weather than the winter season: June to December/low season: January to March/shoulder season: April to May/Weather InformationBranson experiences four fairly mild seasons. Summers can be warm, with temperatures reaching high in the 90s. Spring and autumn see average temperatures ranging between 59 and 82 degrees in the afternoon, with cooler weather at night. Thunderstorms are likely in spring, but rain may fall at any time of the Winter average highs top off at about 58 degrees, but average lows may drop into the 20s. Snow can fall from December to March, but it rarely accumulates. Crowd InformationBranson gets busy in the summer, when schools are holidaying, and during the Christmas holidays for shopping and shows. The city attracts large crowds with many different events and big shows throughout the year, such as the Bluegrass and BBQ Festival from May to June, Veterans Homecoming in November, and Branson's Ozark Mountain Christmas in December.Closure InformationMost hotels, restaurants and shops remain open all year round. However, some hotels, shows and attractions close for a winter break from January to mid-March. When to SaveThe most expensive time to visit is summer, when the city is full of visitors. Although winter may be the least expensive time to visit, there are fewer accommodation options to choose from. Spring is the best time to go because low prices are still available, and there are many more options for activities and accommodation than winter.Information provided by Branson Lakes Area Chamber of Commerce Comstock/Stockbyte/Getty Images The U.S. Mint has produced silver dollar coins featuring Dwight D. Eisenhower, Susan B. Anthony and Sacagawea. The Eisenhower silver dollar was produced from 1971 to 1978 and was succeeded by the Susan B. Anthony silver dollar from 1979 to 1981, with a re-release in 1999. The Sacagawea dollar is part of the Native American coin set and began production in 2000. Prior to the release of the Eisenhower silver dollar, silver dollar designs did not feature a particular person. The Seated Liberty dollar featured an artistic representation of the concept of freedom, as did the Morgan and Peace silver dollars. A 1922 silver dollar can be worth between \$28 and \$63, depending on the state of the coin and whether the coin is spread. A coin is considered distributed if it has been used as a quote. A coin is considered uncirculated if it has never been used and is in new condition. There are coins that are very valuable, even if they are in poor condition: you will want to avoid cleaning those collectible coins. Cleaned coins can be easily spotted by reputable sellers and are worth significantly less on the market. Currency traders cannot easily replenish their stocks by minting new coins; they need to buy more coins from fellow dealers and collectors. Pin Guide Aside from the obvious appeal of visiting a city that borders two states at once (Kansas and Missouri), when visiting Kansas City, you'll also look forward to a thriving art scene, nationally renowned barbecue restaurants and stellar museums, including the National World War I Museum and Memorial. There is even a toy museum for children. The museums The thriving cultural scene is open all year round, so let the weather guide the timing of your travels in Kansas City. The summer months are warm, but prone to tornadoes. The autumn months tend to be dry and relatively mild. If you don't mind risking snowstorms or ice storms, you can enjoy low out-of-season prices in winter. Kansas City has a continental climate, which usually means warm summers with temperatures into the 80s, and mild winters with temperatures usually diving below freezing overnight. May and June see the most rain. Your travel plans in Kansas City will never be boring: blue skies can quickly shift to tornadoes, heavy rain or blizzards. There are several ways you can invest your money. One of the best ways you get exceptional returns on your money is by investing in silver dollars. The price of silver recently hit a 30-year high due to various market forces. Because of his constant demand, the future for silver looks promising. The main temptation to invest in silver is because of the constant demand and market stability in unstable economies. Demand for silver is estimated at 900 million ounces, but the average global production today is only at 480 million ounces. The demand for silver is almost double what is produced. Therefore, when you consider that the supply of this precious metal is depleting, the law of supply and demand would have us predict that the price of silver will skyrocket. Many banks and credit institutions have leased their silver bullion over the past 20 years to generate revenue. Leased silver dollars are meant to be refunded as bullion or in hard currency. Banks often prefer to hold their reserves in the form of bullion and can demand payments from their borrowers in the form of actual bullion. The demand for silver is already almost double the amount that can be delivered. It is very likely that silver dollar collectors and other investors with large amounts of silver will be forced to sell their reserves at very significant prices. Large silver investors often choose to invest by buying silver dollars. This is because of the amount of influence that silver dollar owners hold in determining the price of the precious metal. In 1973 the Hunt Brothers caused a big spike in international silver prices by purchasing millions of ounces of silver dollars and silver futures. The New York Mercantile Exchange, NYMEX and the Federal Reserve actually had to intervene. Even the investment savvy Warren Buffet is rumored to own millions of ounces of silver, which he bought in 1997. With the history of growth and demand for silver, and the history of other very wealthy investors, it would be a wise decision to save part of your portfolio to invest in silver dollars. You never know when the value of silver can spike. Investors are always advised to invest in silver by purchasing the actual silver bullion instead of paper silver. Paper silver takes the form of pooled accounts, bank silver certificates and leveraged accounts. You trust such documents only if the certificate issuer is a legitimate and creditworthy financial institution. Apart from this, this, instability of the stock market can threaten such institutions and the notes and certificates may be lost in the bankruptcy of these institutions. Real silver on the other hand is the hard proof of your investment. It is generally traded in the form of silver dollars or silver bullion bars each with assigned serial numbers. Figures.
